PROFILE

"Many small people who in many small places do many small things can alter the face of the world." (Berlin Wall)

I am...

- o a **Consultant** with an interdisciplinary business and sustainability background
- o an **Innovator** with expertise in the strategy-communication-digitalisation nexus
- o an **Urbanist** passionate about liveable cities and next-generation transportation

...who wants to leverage his self-initiative, creativity, expertise and international experience to collaborate within teams and across networks to address today's interdisciplinary challenges in transformative environments. Thereby, I want to develop and co-create **socially, environmentally and economically sustainable solutions** for mobility, infrastructure and digitalisation.

WORK EXPERIENCE

Senior Consultant Urban Management & Decarbonisation since 5/2015
denkstatt Vienna, Austria

- o Managing and executing **consulting projects** for industry, mobility, real estate, banks, retail, public sector and other actors, including **project acquisition, leading of project teams, project management/controlling and communication**
- o Executing **strategy and stakeholder processes** for national and international clients in logistics, real estate, energy and other sectors, including **analyses, workshops, business model generation and implementation planning**
- o Providing **smart city consulting** for developing smart cities, districts and regions, with **operationalisation, evaluation and communication** of targets and qualities
- o Managing and executing national and international **research projects** on smart industry districts and energy efficient buildings, industry and infrastructure
- o Contributing to the **strategic development** of the Smart Urban Management service and implementing **innovative communication formats** (e.g. smart walk)
- o Supporting businesses with energy, environmental and mobility **subsidies**

EU Expert Evaluator 6/2014 – 5/2016
